RYAN ZERNACH

Mobile App Engineering & AI Infrastructure

Ryan@Zernach.com • **Ryan.Zernach.com** • *(786) 909-7910* • *LinkedIn* • *Github* • *GitLab* • *Remote, Miami Beach, FL, USA*

SUMMARY

I am a YCombinator startup activist who is devoted to teaching & learning. I believe that everyone who writes software is standing on the shoulders of giants. I have a proven track record of: **A)** building beautifully-performant iOS/Android apps and **B)** training and deploying machine learning models.

TECH STACK

- React Native Mobile Apps (iOS & Android)
- AI & Machine Learning Infrastructure
- Agentic LLMs / Generative AI Engineering
- AWS / Google Cloud / Firebase / Azure
- Postgres / SQL / GraphQL / NoSQL
- TypeScript / React JS / Nest JS / Next JS
- XCode / Android Studio
- Github Actions / CI CD / ETL Protocols
- Custom CLI Generators & Bash Scripts
- NodeJS / NextJS / JavaScript / ES6+
- Dashboards & Data Visualizations
- End-to-End (e2e) Tests & Unit Tests
- Webscraping Datasets
- Fluent in Python

EXPERIENCE

AI Engineer & React Native Engineer • **Archlife Industries, LLC** *Dec 2020 – Present*

- Published two marketplace apps and four social network apps
- Deployed agentic AI endpoints for online landscape marketplace app
- Developed a cross between Robinhood & Facebook for exchanging stocks & crypto
- Architected a marketplace for buying/selling deliveries of bulk outdoor landscape supplies
- Created a fitness iOS/Android app for managing gym sessions and making payments
- Refined an iPad React Native app to improve the map's performance and the bluetooth extension

React Native Engineer • **CellarTracker** Aug 2023 - Present

- Helped to boost the new app's ratings to 4.9 average, with over 1,000+ 5-star ratings
- Rebuilt legacy mobile app using React Native for modernization purposes
- Implemented activity feed posts, barcode scanning, and image search
- Created end-to-end (e2e) test suites to ensure long-term quality and stability
- Iteratively improved the redux store for efficient and persistent state management
- Engineered the API for collecting mobile app report tickets, which generate HTML emails
- Developed the mobile app's analytics implementations for tracking tracking user interactions

React Native Engineer • **Demosphere** Mar 2022 - May 2023

- Re-engineered the app's architecture using CLI file generators
- Integrated group chat features, push notifications, and calendar sync
- Improved efficiency by reducing loading times and number of GraphQL API calls
- Transitioned the entire codebase from Javascript to Typescript
- Generated reusable hooks, scripts, components, and screens
- Evaluated Google Crashlytics to further improve stability & performance

React Native Engineer • **FinEquities** *Feb 2021 – March 2022*

- Integrated various APIs, including: bank accounts, stocks, and cryptocurrencies
- Managed front-end, custom back-end cloud functions, and authentication endpoints
- Wrote the data visualizations logic for viewing the performance of stocks & crypto
- Built social network features: chat, user profile, posts, likes, emojis, and comments
- Constructed core functionality: copy portfolio, trending investors, and popular stocks
- Custom-built a companion admin web dashboard to monitor the mobile app's performance

College Tutor for Machine Learning, Web Development, & Data Science • **EdX** *Oct 2020 – Feb 2021*

- Taught over 900 college students JavaScript, HTML, CSS, Python, dashboards, databases, API's, & machine learning
- Managed a busy schedule of remotely teaching 30+ students per week for ~60 minutes per lesson

---

EDUCATION

Data Science Software Engineering *Sept 2019 – Oct 2020*

Lambda School (AKA BloomTech) • Remote • San Francisco, CA

- Productionizing Machine Learning Models, Python, HTML, Data Engineering, SQL, NoSQL, Back-End API's, Dashboards, Image Recognition Models, Natural-Language Processing (NLP) Models, Neural Networks, Data Visualizations, Statistical Analysis, Classic Algorithmic Paradigms, Time Complexity, Data Structures

Computer Science & Mathematics *Aug 2011 – Dec 2012*

Georgia Southern University • Statesboro, GA

- Calculus I, Calculus II, Calculus III, Statistics, Data Structures, Programming Principles I, Programming Principles II, Discrete Mathematics, Ethics of Computers in Society

---

CERTIFICATIONS

- AWS Cloud Practitioner
- Google Cloud Developer
- DataRobot 10x Data Science AutoML
- Mosh: React Native Academy
- Y Combinator Startup School
- TensorFlow Developer

REACT NATIVE iOS/ANDROID PROJECTS
