RYAN ZERNACH

iOS, Android, & Web Developer

React Native & React Developer

Ryan@Zernach.com • **Ryan.Zernach.com** • *(786) 909-7910* • *LinkedIn* • *Github* • *GitLab* • *Miami, FL, USA*

SUMMARY

As a full-stack software engineer with a proven track record of building iOS/Android/Web apps from scratch to deployment, I am a team player devoted to teaching and learning. Whether I am converting designs to code, building APIs, creating databases, training machine learning models, or managing authentication workflows, I am committed to delivering software solutions that exceed the needs of users, colleagues, and clients. Some of my personal passion projects can be found at Ryan.Zernach.com.

TECH STACK

- React Native Mobile Apps (iOS & Android)
- TypeScript / React Web / HTML / CSS
- React Native CLI / Expo CLI
- XCode / Android Studio
- Back-End API's & Endpoints
- GraphQL, SQL, NoSQL Databases
- Python & Machine Learning
- AWS / Google Cloud / Firebase / Azure
- Git Version Control / CI / CD / FastLane
- Custom CLI Generators & Bash Scripts
- NodeJS / NextJS / JavaScript / ES6+
- Dashboards & Data Visualizations
- Unit Tests & Integration Tests
- Webscraping Datasets

EXPERIENCE

Lead React Native iOS/Android Developer • **Demosphere** 2022 - 2023

- Oversaw app's design, development, testing, and publishing
- Re-engineered the app's architecture using CLI file generators
- Mentored, assisted, and peer-reviewed a junior React Native team
- Integrated group chat features, push notifications, and calendar sync
- Overhauled the UI/UX, performance, and core functionality of the app
- Improved efficiency by reducing loading times and number of GraphQL API calls
- Re-wrote npm/yarn packages using raw React Native to slim down dependencies
- Transitioned the entire codebase from Javascript to Typescript
- Generated reusable hooks, scripts, components, and screens
- Published updates to the Apple and Google app stores
- Modernized and maintained newest React Native & Expo versions
- Evaluated Google Crashlytics to further improve stability & performance

React Native iOS/Android Developer • **Finequities** *2021 – 2022*

- Managed front-end, custom back-end cloud functions, and authentication endpoints
- Integrated various APIs, including: bank accounts, stocks, and cryptocurrencies
- Wrote the data visualizations logic for viewing the performance of stocks & crypto
- Built social network features: chat, user profile, posts, likes, emojis, and comments
- Constructed core functionality: copy portfolio, trending investors, and popular stocks
- Custom-built a companion admin web dashboard to monitor the mobile app's performance

React & React Native Developer (Freelance Contracts) • **Archlife Industries** *2020 – 2022*

- Designed, developed, & published three iOS/Android social networks
- Created a fitness iOS/Android app for managing gym sessions and making payments
- Refined an iPad React Native app to improve the map's performance and fix bugs
- Built websites for clients and taught them about long-term website maintenance

College Tutor for Web Development, Data Visualizations, & Data Science • **EdX** *2019 – 2021*

- Taught over 900 college students JavaScript, HTML, CSS, Python, dashboards, databases, API's, & machine learning
- Managed a busy schedule of remotely teaching 30+ students per week for ~60 minutes per lesson

---

EDUCATION

Data Science Software Engineering *2018 – 2019*

Lambda School (AKA BloomTech) • Remote • San Francisco, CA

- Productionizing Machine Learning Models, Python, HTML, Data Engineering, SQL, NoSQL, Back-End API's, Data Visualizations, Natural-Language Processing (NLP) Models, Neural Networks, Statistical Analysis, Classic Algorithmic Paradigms, Time Complexity, Data Structures

Computer Science & Mathematics *2011 – 2012*

Georgia Southern University • Statesboro, GA

- Calculus I, Calculus II, Calculus III, Statistics, Data Structures, Programming Principles I, Programming Principles II, Discrete Mathematics, Ethics of Computers in Society

---

CERTIFICATIONS

- AWS Cloud Practitioner
- Google Cloud Developer
- DataRobot 10x Data Science AutoML
- Mosh: React Native Academy
- Y Combinator Startup School
- TensorFlow Developer

PERSONAL PROJECTS

STEM Tech Network — *iOS/Android Social Learning Network for Future-Focused STEM-related Topics*

- Built my own idea in my free-time as a full-stack, solo, unicorn developer (everything front-end to back-end)
- Integrated with AWS database & Hasura GraphQL endpoint for access to live websocket connection
- Hosted custom API's on Netlify and connected with Google Firebase to store images/videos and user auth
- Implemented Over-the-Air (OTA) Updates to instantly deliver bug fixes and improvements to users
- Utilized custom CLI templating to generate exceptionally organized Typescript components & screens

Marriage DAO — *Miami Hack Week 2023 Hackathon*: *Blockchain iOS/Android React Native App*

- Implemented @WalletConnect for users to login using one of dozens of web3 blockchain wallet providers
- Leveraged API for users to create blockchain marriage contracts on the Ethereum/Polygon Blockchain network
- As part of the competition, we only had five days to complete this project, and we also created a React website

Landscape Supply App — *iOS/Android App & Online Web Management Dashboard to Buy/Sell Landscape Supplies*

- Designed and developed the iOS/Android app in React Native & built the web dashboard
- Used Python/Flask for the back-end api's, and HTML/JS/CSS for the web dashboard
- Custom-built a companion Python Flask web app for accepting Stripe payments
