RYAN ZERNACH

AI Infrastructure & Mobile App Development

Ryan@Zernach.com • **Ryan.Zernach.com** • *(786) 909-7910* • *LinkedIn* • *Github* • *GitLab* • *Remote, Miami, FL, USA*

SUMMARY

I want to deliver to the world the most intelligent cellar-management software that exists. I have a proven track record of training/deploying machine learning models and building iOS/Android/Web apps from scratch. I am a team player who is devoted to teaching & learning. Everyone is standing on the shoulders of giants.

TECH STACK

- AI & Machine Learning Infrastructure
- Back-End Engineering / WebSockets
- AWS / Google Cloud / Firebase / Azure
- GraphQL, SQL, NoSQL Databases
- React Native Mobile Apps (iOS & Android)
- TypeScript / React Web / HTML / CSS
- XCode / Android Studio
- Github Actions / CI CD / ETL Protocols
- Custom CLI Generators & Bash Scripts
- NodeJS / NextJS / JavaScript / ES6+
- Dashboards & Data Visualizations
- Unit Tests & Integration Tests
- Webscraping Datasets
- Fluent in Python

EXPERIENCE

React & React Native Developer (Freelance Contracts) • **Archlife Industries** *Dec 2020 – Present*

- Designed, developed, & published four iOS/Android social networks
- Created a fitness iOS/Android app for managing gym sessions and making payments
- Refined an iPad React Native app to improve the map's performance and the bluetooth extension
- Built websites for clients and taught them about long-term website maintenance

Lead React Native iOS/Android Developer • **Demosphere** Mar 2022 - May 2023

- Oversaw app's design, development, testing, and publishing
- Re-engineered the app's architecture using CLI file generators
- Mentored, assisted, and peer-reviewed a junior React Native team
- Integrated group chat features, push notifications, and calendar sync
- Overhauled the UI/UX, performance, and state management patterns
- Improved efficiency by reducing loading times and number of GraphQL API calls
- Re-wrote npm/yarn packages using raw React Native to slim down dependencies
- Transitioned the entire codebase from Javascript to Typescript
- Generated reusable hooks, scripts, components, and screens
- Modernized and maintained newest React Native & Expo versions
- Evaluated Google Crashlytics to further improve stability & performance

React Native iOS/Android Developer • **FinEquities** *Feb 2021 – March 2022*

- Integrated various APIs, including: bank accounts, stocks, and cryptocurrencies
- Managed front-end, custom back-end cloud functions, and authentication endpoints
- Wrote the data visualizations logic for viewing the performance of stocks & crypto
- Built social network features: chat, user profile, posts, likes, emojis, and comments

- Constructed core functionality: copy portfolio, trending investors, and popular stocks
- Custom-built a companion admin web dashboard to monitor the mobile app's performance

College Tutor for Machine Learning, Web Development, & Data Science • **EdX** *Oct 2020 – Feb 2021*

- Taught over 900 college students JavaScript, HTML, CSS, Python, dashboards, databases, API's, & machine learning
- Managed a busy schedule of remotely teaching 30+ students per week for ~60 minutes per lesson

---

EDUCATION

Data Science Software Engineering *Sept 2019 – Oct 2020*

Lambda School (AKA BloomTech) • Remote • San Francisco, CA

- Productionizing Machine Learning Models, Python, HTML, Data Engineering, SQL, NoSQL, Back-End API's, Dashboards, Data Visualizations, Natural-Language Processing (NLP) Models, Neural Networks, Statistical Analysis, Classic Algorithmic Paradigms, Time Complexity, Data Structures

Computer Science & Mathematics *Aug 2011 – Dec 2012*

Georgia Southern University • Statesboro, GA

- Calculus I, Calculus II, Calculus III, Statistics, Data Structures, Programming Principles I, Programming Principles II, Discrete Mathematics, Ethics of Computers in Society

---

CERTIFICATIONS

- AWS Cloud Practitioner
- Google Cloud Developer
- DataRobot 10x Data Science AutoML
- Mosh: React Native Academy
- Y Combinator Startup School
- TensorFlow Developer
