## SUMMARY

I'm Ryan, a collaborative team member & leader who enjoys simplifying architectures with every change and shipping agentic automation workflows using AI, LLM's, ML, GenAI, and audio. When building front-end & back-end solutions, I measure site uptime, infrastructure latency, accuracy, \$/task, and \$/quality. I've scaled apps to millions of users and have built durable infrastructure with an emphasis on observability, reusability, reliability, cost-efficiency, speed, and security. My background includes **10+ total years of Engineering**, **7+ years of Python**, and **6+ years of TypeScript**
