SUMMARY

I'm Ryan, a collaborative team member and leader with 10+ years of engineering experience. I simplify codebases with every feature and ship agentic automation workflows using AI, LLMs, ML, GenAI, and audio/video. When building full-stack solutions, I measure uptime, latency, accuracy, \$/task, and \$/quality. I've scaled apps to millions of users and have built durable infrastructure with an emphasis on observability, reusability, reliability, cost-efficiency, speed, and security.
